A Deal is a defined prize structure comprising a set number of tickets with set prize amounts established to achieve a total prize value. \*Prize Payout is the theoretical payout percentage based on the dollar amount of all cash prizes offered within a TapTix Deal at the time that the Deal is initiated and assuming all tickets for that Deal are purchased and all cash prizes are claimed. The final Prize Payout for a TapTix Deal is determined when a Deal is ended, and is based on the actual number of tickets that were purchased by consumers and the total value of the cash prizes claimed. Prizes for games are randomly distributed within a complete Deal of tickets. Deals are loaded into one or more TapTix machine(s) or held in inventory until a machine is reloaded. At time of purchase, some prizes offered may have already been claimed. Provided odds of winning any prize are approximate and based on a complete Deal of tickets. Odds may be subject to change. Malfunctions void all pays and plays. For more information on TapTix, including individual TapTix game odds and prize structures, visit the Customer Service Desk or refer to the "Rules" section on the TapTix machine.
